Fall Newsletter

Dear Friends & Allies,

Our projects are really taking off this summer! Check out our innovative model for integrating solar into Energy Assistance in Vermont, our work with Habitat for Humanity in Minnesota, and join us for our fundraiser in Duluth for a project in Liberia!

Community Solar for Community Action (CS4CA) in Vermont

We are creating a community solar array in Vermont, and we need your assistance. The solar array will demonstrate a new, sustainable, long-term solution to energy poverty so families in Windham and Windsor County never

again have to choose between paying their energy bills or other basic needs, like food or healthcare. Learn more and support the project here.

Habitat Project in Foley

We just completed an array earlier in August at the Jensen residence in Foley, MN! Thank you to Central MN Habitat for Humanity for another successful partnership. The system will save the Jensens

more than \$600 a year! Thank you to the University of Minnesota Extension Central Region Sustainable Development Partnership (<u>CRSDP</u>), the Clean Energy Resource Teams (<u>CERTs</u>), and <u>Werner Electric</u> for helping make this project a reality. Read more about the project <u>here</u>.

Our Team is Growing

There are now 17 team members here at RREAL, including our two new AmeriCorps VISTAs, Peter Gebauer and Rachel Juritsch. Go to our website to learn more about them and their upcoming year of service as well as our other new team members. Join us in welcoming them!

Donate Now

Join us in Duluth for our Current for Curran fundraiser!

If you are unable to make it, you can still contribute by donating <u>here</u> or create a fundraising page.

Hoops Brewing, Duluth, MN September 20th, 6pm

Rural Renewable Energy Alliance (RREAL)

Thank you all for your ongoing support of our work!

Sunny Regards and Happy Fall,

The RREAL Team
